Hi David,

Hernandez is waiting for one more sub quote so they'll have their formal cost proposal by the end of the week.

I already told them to remove all the testing line items.

Thanks,

Teenchee Le, P.E.

Thanks David. I'll let Hernandez Engineering know about the testing and traffic control while we continue to review the estimate.

Thanks,

We should have the City's MTL do the testing.

Also, the traffic control is pretty high as it is based on the entire contract duration but the only work that will require traffic control is when they do the curb/driveway and pathway work adjacent to the onramp.

I only gave it a quick look through and was not able to review the entire estimate yet.

Thanks,
David

David Froehlich, PLA

Hi David,

The attached proposal is just a rough draft since they have questions. I'll work with them to nail down the final proposal. At least we have a ballpark number.

Contractor will be charging almost \$10,000 for testing services. Are we having contractor do it or would you prefer using the City's Material Testing Lab?

Thanks,

Subject: RE: Request for Proposal for J38-01 "Cesar Chavez Bike Path - Hairball F/G"

Good Morning David and Teenchee,

Please see attached PDF copies of our DRAFT proposal for "Cesar Chavez Bike Path – Hairball F/G".

I have included the summaries and details both by Category and CSI for your review. We have added as many notes as possible to facilitate the review. We continue to finalize some of the pricing as we could not locate some of the items in the CSI task catalog such as bronze handrail and landscape boulders. We continue to coordinate with subcontractors. Items marked with ***** under Category 2 are items we have some questions or need additional info.

Please let us know if you have any questions or if you would like to meet to discuss.

Thank you
